Packed: 24 x 12 cm / 9 x 5"

Material: same as Scout Hammock

Weight limit: 200 kg / 484#

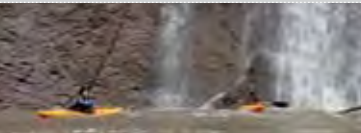

SCOUT HAMMOCK

Hammocks in two sizes.

> What do the jungle, steep slope, forest and a tropical island have in common? All are perfect places for Exped Scout Hammocks. Use Bivy-Poncho or other tarp for basic rain protection. To combat biting insects, add Exped Moskitonet.

- a> Integrated packsack holds water bottle, glasses, or other small gear.
- b> Strong cords on both ends are sewn with a special technique designed for durability. Scout DLX's cords adjust to suit your preferred body position. Or, completely detach cords for use as a sun shelter.
- > Loops on the DLX hold poles to convert the free form hammock to a supported hammock.
- > DLX includes 2 special cords (5m/15') to assist in hanging the hammock. Cord ends slide through special slits and secure with a knot.
- > DLX is large enough to allow sleeping horizontally or diagonally.
- > Just swinging along... Scout Hammock DLX uses a special drawcord that converts the hammock to a swinging chair. On Scout Hammock, simply tie a knot into the middle of the hem on one side.

Everybody wants protection from Nature's most annoying and unwanted visitors - mosquitoes and other small pests.

Scout Hammock Mosquitonet

Weight: 440 g / 15.5 oz

Size: 3.40 x 2 m / 11 x 6.5'

Packed: 30 x 15 cm / 10.5 x 6.5 x 3"

Material: No-See-Um mosquito netting

SCOUT HAMMOCK MOSQUITO NET

Protective netting keeps insects out.

- > Tiny insects and small animals are interesting to watch... from a distance. But when they begin to do the watching, then Mosquito Net becomes a very handy accessory!
- > The packsack functions as pocket holding glasses, bottles and other small gear. Interior, accessory loops hold additional gear.
- > Dark color offers great visibility without the reflection that accompanies bright colors.
- > Exterior loops are used to attach guylines for a roomier setup.
- > Tapered, banana shape ensures a safe distance from the hammock on all sides to thwart biting insects.
- > Tube entrance accesses from below and secures with an elastic band for quick entry and exit while keeping the pests out.
